

# **PRODUCT DEVELOPMENT**

## **JOB POSTING**

Rhema Health Products Limited is a contract manufacturer of natural health products, dietary supplements, foods and drugs. Rhema is currently seeking an individual to join the Product Development / Technical Services department.

### **CANDIDATE REQUIREMENTS :**

- University degree in Food Science, Human Nutrition or Food Technology Certification
- Excellent leadership skills, ability to multitask, project coordination, and manage by objectives
- Excellent communication, planning, organizational, mathematical and budgeting skills
- Demonstrate proficiency with manufacturing resource planning software, Excel, and Word
- Self-motivated and able to work under pressure and time sensitive conditions
- Demonstrates extreme accuracy and precision in a lab environment
- Adeptness in sensory skills (taste, odour and visual)
- Previous experience and knowledge in R&D, Health Canada Natural Health Products Regulations, Food & Drug Regulations, Good Manufacturing Practices and Analytical Test Methods in a production environment are significant assets
- Knowledge of manufacturing dry dosage forms (including blending, tableting, coating, encapsulating, and powder filling) and packaging is highly desirable.
- Individuals with food allergies may not be suitable for this position.

### **JOB RESPONSIBILITIES :**

- Formulate, research, and develop food, natural health, and drug products in powder drink mix, tablets, and capsules formats.
- Be able to coordinate projects from concept to commercialization including managing all documentation and packaging components.
- Be able to calculate nutritional and heavy metal formula content and ensure raw materials meet customer and regulatory criteria.
- Research current and emerging raw materials for their health benefits, safety, and efficacy and evaluate their potential usage in new formulations.
- Maintain up to date knowledge on market trends.
- Maintain a competent understanding of Canadian Natural Health Products, Food and Drugs regulations.
- Provide technical support to sales, purchasing, operations and quality control where applicable.
